

# JT Technologies Line Card

(607) 773-1214

[www.jttech.net](http://www.jttech.net)

**Fine-Line Circuits, Ltd.** – ISO certified manufacturer of high complexity, high quality PCBs.

**IAC Industries** – Industrial workstations, workbenches & seating.

**RS Simmons Co., LLC** - SimmScope manual optical inspection system.

**Simplimatic** – PCB handling, conveyors and automation.

**Mycronic** – Pick & place, high-speed solder paste “jet” printing, automatic SMT component storage/retrieval towers.

**Vitronics/Soltec** – Reflow ovens, wave solder and selective soldering equipment.

**Air-Vac Engineering** – SMT rework, thru-hole soldering/de-soldering equipment, high-precision assembly cells.

**Artos Engineering** – Wire cutting, stripping & terminating equipment.

**Nikon Metrology** – X-ray/CT inspection systems.

**Mirtec** – AOI and 3D solder paste inspection systems.

**Data i/O** – Flash memory/device programming.

**Seica** – Flying probe and fixture based ICT and functional test equipment, laser selective soldering.

**Hepto** – Component forming and BGA re-balling equipment.

**Zestron** – Aqueous-based chemistry for PCB and precision metal cleaning.

**Austin American Technology** – Inline and batch aqueous cleaning equipment.

**Sono Tek** – Ultrasonic spray fluxers & solder reclaim equipment.

**Specialty Coating Systems** – Spray coating & dispensing equipment. Ionograph & Omegameter ionic contamination test systems.

**Totech - Super Dry** – Drying Cabinets and Vacuum Machines for Moisture Sensitive Components.

**Cencorp** - PCB depaneling, laser marking and odd-form assembly.

**Kester, Inc.** - Solder and soldering materials - leaded and lead-free solder paste, wire solder, bar solder, solder pre-forms, liquid flux and flux paste.

**RPS Automation, Inc.** - Selective solder machines, lead tinning/solderability testing equipment.
